DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art does not disclose a second phase detector having a second detecting section for detecting a phase of the object in a phase different from said first phase detector and a second binarization section for binarizing the phase that said second detecting section has detected by setting the hysteresis. Prior art does not disclose a power supply section having intermittent energized mode.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 6,351,154 discloses a phase detector including a voltage controlled oscillator generating a voltage controlled oscillator output and some logic state device for receiving said voltage controlled oscillator output as an input.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tony Ko whose telephone number is 571-272-1926. The examiner can normally be reached on Monday-Friday 7:30 - 4:00.
